Industrial Diamond Review

VOLUME 32 JANUARY to DECEMBER 1972 Nos. 374-385

Key to page numbers

No. 374	January	pp 1- 23	No. 378	May	pp 177-203	No. 382	September	pp 325-402
No. 375	February	pp 45- 70	No. 379	June	pp 223-256	No. 383	October	pp 423-442
No. 376	March	pp 91-111	No. 380	July	pp 277-303	No. 384	November	pp 463-484
No. 377	April	pp 131-155	No. 381	August	pp 325-355	No. 385	December	pp 501-521

AUTHORS' INDEX

A

Arming, H., Stiebellehner, W.
Grinding wear-resistant metal coatings with diamond abrasive wheels, 283

Arnold, H. F.
Rotterdam's peaceful solution, 199

B

Bhukhanvala, P. R.
The embossing of artificial jewellery on diamond-tooled power presses, 510

Büttner, A.
The use of large circular saw blades on hard stone, 474

Busch, D. M., Grassman, J.,
The effect of wheel speed in grinding various materials with diamond wheels, 5

Busch, D. M., Lindenbeck, D. A.
A method for calculating minimum grinding costs, 280

C

Conradi, V. R. *see* **Dyer, H. B., Conradi, V. R.**

Cooper, D. G.
Abrasive system selection factors for metal bonded wheels, 58

D

Daniel P.
Form grinding of ceramic seals, 91
Metal bond diamond wheels in the production of spiral carbide cutters, 177
Teamwork + EMB = UK drilling record, 186
Controlling Central London's traffic—the modern way, 325
Coking coal analysis using diamond reflectance standards, 328
The diamond grinding of boron carbide, 470

Driver, D., Wilks, E. M., Wilks, J.
Directional variations in the resistance of diamond to abrasion, 438

Dutta, N. C.
Developments in hard rock drilling practice in India, 508

Dyer, H. B., Conradi, V. R.
Properties of natural Debdust and its use in diamond saw blades, 335

E

Ebisawa, T.
Titanium-shank diamond styli for high quality sound reproduction, 150

Evans, R. G.
The correct way to saw and break out pavement, 400

F

Farrar, R.
Diamond to fly in weather satellite, 246

Fridman, V. M. *see* **Loshak, M. G., Kabanovskii, L. N., Fridman, V. M.**

G

Gordeev, A. V. *see* **Reznikov, A. N., Gordeev, A. V.**

Grassman, J. *see* **Busch, D. M., Grassman, J.**

H

Hallez, C. P.
Machining reconstituted stone with diamond tools, 286

Hamada, Y.,
Diamond adds a new dimension to photographic reproduction, 131

Hamada, Y., Tanida, N.
Grinding quartz glass, ceramics and ferrite with diamond wheels, 427

Herbert, S.
A slice of history in fifty seconds, 1
Now it's do-it-yourself contact lens production for the optician, 45
A target for NINA, 54
Shaping the antiques of tomorrow, 100
The 'natural' gas converter, 106
Human tissue—a new workpiece material, 180
Mullard adds an 'A' to 'R & D', 223
Sectioning the teeth of antarctic seals, 243
Yesterday's materials, today's methods, 277
An heir for the declining duchess, 294
Restoring the microtome knife edge—a better method, 331
A marriage of successes, 375
Diamonds smooth the way to better economics, 379
Dressing costs down, productivity up, 423
Dynamic gauging with diamond points, 432
Diamond—the vital link in site investigation, 463
Sawing for posterity, 501
Take a tip from Players, 505

I

Ikawa, T.
A new approach to wafer dicing, 136

K

Kabanovskii, L. N. *see* **Loshak, M. G., Kabanovskii, L. N., Fridman, V. M.**

Kobayashi, A., Tsukada, T.
A highly accurate polygon-mirror for an automatic surface inspection device, 133

Kremnev, L. P.
The diamond grinding of soft magnetic materials, 109

L

Lane, W. L.
Preserving centuries-old masonry, 402

Leite, C. R.
Inclusions in Brazilian diamonds, 251

Lindenbeck, D. A., Witt, E.
Residual stresses in workpieces ground with various abrasives, 344

Lindenbeck, D. A. *see* **Busch, D. M., Lindenbeck, D. A.**

Loshak, M. G., Kabanovskii, L. N., Fridman, V. M.
The influence of diamond grinding on carbide strength, 18

Lukschandel, J.
Semi-automatic powder analysis, 300

M

Mairlot, H.
The texture of ground glass surfaces, 61

Markov, A. I., Ustinov, I. D.
A study of the ultrasonic diamond drilling of non-metallic materials, 97

Marx, C.
Industrial drill bits and their use in the construction industry, 93

Matsuda, Y.
Precision cutting by band saw machine, 139

Meyer, H. R.
A new type of resin bond for diamond grinding wheels, 384

N

Nakajyo, R. *see* **Sato, T., Nakajyo, R.**

Norling, G.
Ice skating, tungsten carbide and diamonds, 104

O

Oates, P. D.
Advances in grinding fluids, 12

P

Parekh, A. M.
Diamond in the manufacture of jewel bearings, 514

Patel, A. R., Patel, T. C.
Some observations on network patterns on dodecahedral faces of diamond, 512

Patel, T. C. *see* **Patel, A. R., Patel, T. C.**

Pruslin, G. Sh., Pryakhin, V. M., Rudakov, A. A.
Bevelling the edges of colour TV cathode ray tube screens, 436

Pryakhin, V. M., *see* **Pruslin, G. Sh., Pryakhin, V. M., Rudakov, A. A.**

R

Raal, F. A.
Type IIa diamond—the superlative heat sink, 192

Reznikov, A. N. Gordeev, A. V.
Electrical simulation of the diffusion wear of diamond during grinding, 248

Rowlands, D.
Single diamond cutting of rock, 394
Rudakov, A. A. *see* **Pruslin, G. Sh., Pryakhin, V. M., Rudakov, A. A.**

S
Sato, T., Nakajyo, R.
Electrolytic grinding of carbide rolling mill rolls using a diamond profiling wheel, 154
Scatena, R.
Diamond drilling at the French Atomic Energy Commission, 477
Smith, L. I., Trottier Jnr., G. M.
A cybernetic method of comparing diamond wheel performance in dry carbide grinding, 50
Spink, K.
The nature of the diamond drilling process, 230
Steinmetz, K.
Berlin air visitors and the safety aspect, 227
Stiebellehner, W. *see* **Arming, H., Stiebellehner, W.**

T
Takazawa, T.
Thermal aspects of the grinding operation, 143
Tanida, N. *see* **Hamada, Y., Tanida, N.**
Thiel, N. W.
The dry grinding of tungsten carbide/steel combinations with diamond wheels, 467
Trottier Jnr, G. M. *see* **Smith, L. I., Trottier Jnr, G. M.**
Tsukada, T. *see* **Kobayashi, A., Tsukada, T.**

U
Ustinov, I. D. *see* **Markov, A. I., Ustinov, I. D.**

W
Wilks, E. M. *see* **Driver, D., Wilks, E. M., Wilks, J.**
Wilks, J. *see* **Driver, D., Wilks, E. M., Wilks, J.**
Witt, E. *see* **Lindenbeck, D. A., Witt, E.**

Industrial Diamond Abstracts

Index January-December 1972

Authors' Index	2
Trade Name and Company Index	8
Key to Abstract Numbers	12

Industrial Diamond Abstracts

VOLUME 32 JANUARY to DECEMBER 1972 Nos. 362 to 373

General Notes: (1) individuals, societies, and institutions appear in the first part of the index, whilst commercial companies and trade names are listed in the second part. (2) Lists of new patents (section W) are not included. (3) Patentees from patent abstracts are indicated by an asterisk. (4) Abbreviated words *eg* St for Saint, Mc for Mac, appear in the alphabetical order of the full version. (5) Numbers given are abstract numbers: in order to locate in which issue a given abstract may be found, a key is appended. (6) Abstract numbers in brackets are of 'internal' references, *ie* they are not authors of the articles or patents but are referred to in the text.
